

4-piece set: Gas turbine multiple unit class 602, DB

7720002 | DB

railway company: DB

0,00€

4-piece gas turbine multiple unit class 602 of the German Federal Railway.

Basic set consisting of two power heads (one powered), one compartment coach and one open seating coach.

Update!

- Gas turbine version of our popular TEE/Intercity multiple unit
- For the first time with PluX22 sound decoder and LED headlight
- Sound in both power heads

Because the performance of the diesel-powered VT 11.5 (class 601) proved insufficient, four power heads were converted to gas turbine drive in 1971, the most striking feature of which was the large air intakes in front of the driver's cab which supplied the turbine with air.

Due to deficiencies, the operation of these trains became increasingly uneconomical, which is why the multiple units running under the designation class 602 were taken out of service again by the DB in 1978 and 1979. Only the power head 602 003 has been preserved for museum purposes. It can now be found in the DB Museum in Nuremberg.

General data

Minimum radius	358 mm
Flywheel	yes
Number of driven axles	3
Number of axles with traction tyres	1
Article number	7720002
EAN	9005033062774
Interior fitting	Model with interior furnishing
Scale	H0
Epoch	IV
Railway Company	DB

Electrical

Motor	5-pole motor
Interior lighting Article number	40420
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Decoder-Type	MS450P22
Sound	yes
Buffer capacitor	yes
Interior lighting	Retrofittable
Control	AC
Interface	Electrical interface for traction units PluX22
Digital decoder	PluX22

Measurements

Length over coupling

880 mm
